

NETWORK SECURITY GROUP, INC. (NSG) helps businesses and organizations of all sizes design, build, and maintain their information security programs, policies and infrastructure. We provide processes and solutions to protect data and privacy, keep your systems available, manage your environment, and meet your company and/or industry compliance objectives.

We understand that every company has a unique strategy based on their business goals, size and budget. Our goal is to understand your objectives and recommend software and hardware solutions that best fit your needs.

Solutions

Anti-Spam - solutions designed to examine incoming email at the gateway, server, or desktop and separate spam email from legitimate mail. These solutions can help enforce security email policy and cut down on the nuisance and inefficiency caused by internet spam. Barracuda, GFI, and Lightspeed Systems are some of our partners in this area.

Anti-Virus (Malware) - solutions that offer protection against viruses, spyware and adware programs. These unauthorized hidden programs expose confidential information and also slow down performance of systems. ESET and Sophos are some of our partners in this area.

Content Filtering - solutions that block or filter undesirable, dangerous, or inappropriate internet content - these solutions help enforce security email and web policy. Barracuda and GFI Security are some of our partners in this area.

Email Archiving - solutions that store emails allowing easy retrieval and access to help comply with recent regulations. Barracuda and GFI Security are some of our partners in this area.

Firewalls - solutions that control network traffic between different zones of trust, protecting the perimeter and core network infrastructures. Fortinet, Lightspeed Systems and Sonicwall are some of our partners in this area.

Identity and Access Management (IAM) - solutions that provide password management, directory integration, single sign-on, strong authentication and user provisioning. RSA and e-Aladdin are some of our partners in this area.

High Definition Video Conferencing - affordable high definition conferencing solutions that runs on your existing architecture – 1MB to achieve HD quality. Lifesize and Face2Face are our partners in this area.

Network Access Control (NAC) - software and hardware based solutions that enforce policies controlling and monitoring network access. Sophos and Bradford Networks are some of our partners in this area.

NSG Services - our network security staff provides full a range of services including penetration testing, vulnerability assessments, PCI/HIPPA compliance, installation and migrations.

Security Info & Event Mgmt (SIEM) / Risk Management - solutions that help classify important business assets, discover critical vulnerabilities, and take measures to defend against threats aimed at those systems/assets. GFI, Q1 Labs, and Nitro Security are our partners in this area.
